DEUTZ TCD 2.2

For Tractors Agricultural

45–55.4 kW | 60–74 hp at 2200–2600 min⁻¹/rpm | EU Stage V

The DEUTZ TCD 2.2 is the compact, water-cooled 3-cylinder inline engine for tractors with a power range from 45 to 55.4 kW.

DISCOVER THE TCD 2.2

- Newly-designed, water-cooled 3-cylinder inline engine with powerful common rail injection system, turbo charging and charge air cooling.
- Engine and exhaust aftertreatment (EAT) are optimised for highest total system efficiency and thus ensure lowest consumption and cost.
- The engines meet the requirements of the EU Stage V and US EPA Tier 4 with DVERT® particulate filter (DPF). A variant without EAT is available as an option for less regulated markets.

- The engine family 2.2 / 2.9 is based on an integrative platform. The installation dimensions and customer interfaces are almost identical, so that a uniform solution is available over a wide range of applications.
- The extremely compact engine design and customer friendly accessories reduce the installation costs and increase the number of applications.
- Best cold starting performance even under extreme conditions.

- 100% power take-off at flywheel and front end and additional side PTO drive with up to 120 Nm for the mounting of up to two hydraulic pumps.
- 500 h oil change intervals and a maintenance-free valve train result in low maintenance costs and increased machine availability.

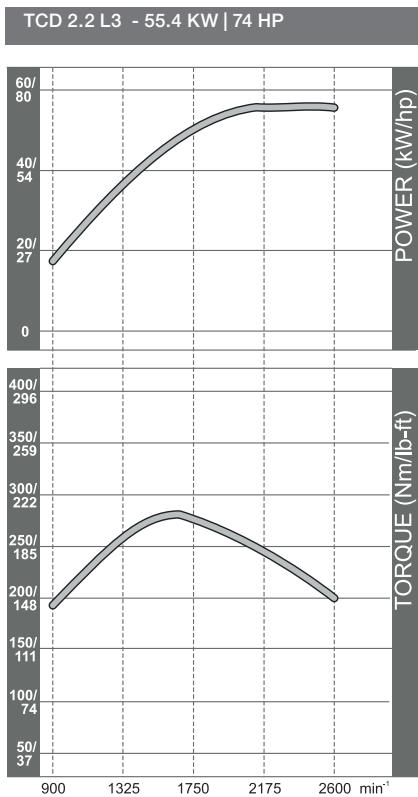

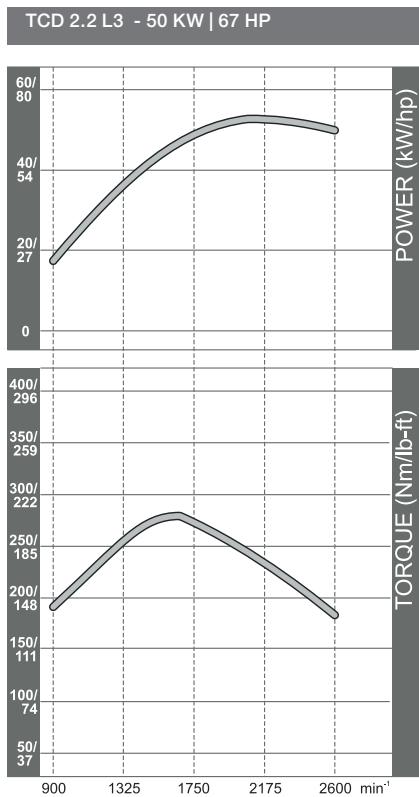

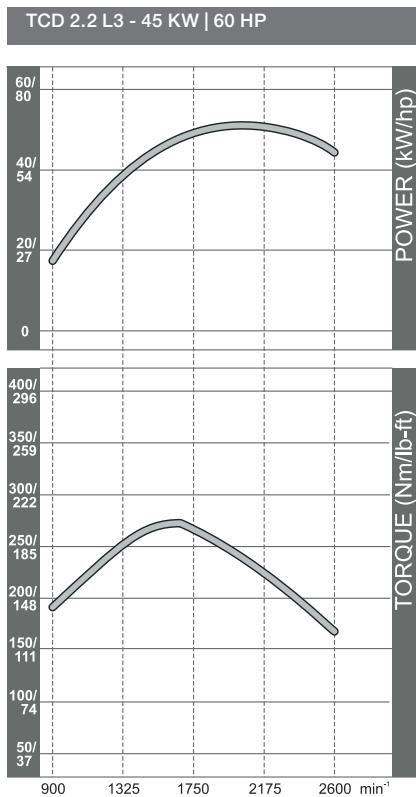

TECHNICAL DATA

Engine type	TCD 2.2 L3			
No. of cylinders	3			
Bore/stroke	mm in	92/110 3.62/4.33		
Displacement	l cu in	2.2 0.73		
Max. nominal speed	min ⁻¹ rpm	2600		
Engine type	TCD 2.2 L3			
Power output as per ISO 14396 ¹⁾ at speed	kW hp min ⁻¹ rpm	45 60 2600	50 67 2600	55.4 74 2600

Note: The engine dimensions and weights vary depending on the scope of delivery.

DEUTZ TCD 2.9

For narrow-track tractors

63–77 kW | 84–103 hp at 2200 min⁻¹/rpm | EU Stage IIIB

The DEUTZ TCD 2.9 NT is the compact, water-cooled 4-cylinder inline engine for narrow-track tractors with a power range from 84 to 103 hp. It complies with the requirement of the EU Stage III B. The engine has turbocharging, charge-air cooling and cooled external exhaust gas recirculation.

DISCOVER THE TCD 2.9

- Newly-designed, water-cooled 4-cylinder inline engine with cooled external exhaust gas return with turbo charging and charge air cooling.
- Use of DVERT® oxidation catalytic converter (DOC) enables maintenancefree operation under all application and ambient conditions.
- 100% power take-off at flywheel and front end and additional side PTO drive with up to 120 Nm for the mounting of up to two hydraulic pumps.
- Best cold starting performance even under extreme conditions.

- The engines have an modular exhaust gas aftertreatment system (EAT).
- 500 h oil change intervals and a maintenance-free valve train result in low maintenance costs and increased machine availability.
- The powerful Common Rail injection system and highly-efficient combustion process with cooled external exhaust gas recirculation ensure optimum engine performance at low fuel consumption and exhaust emissions.
- The engine fulfil the requirements of EU stage IIIB with the DVERT® oxidation catalytic converter.

- The extremely compact engine design and customer friendly accessories reduce the installation costs and increase the number of applications.

TORQUE CURVES

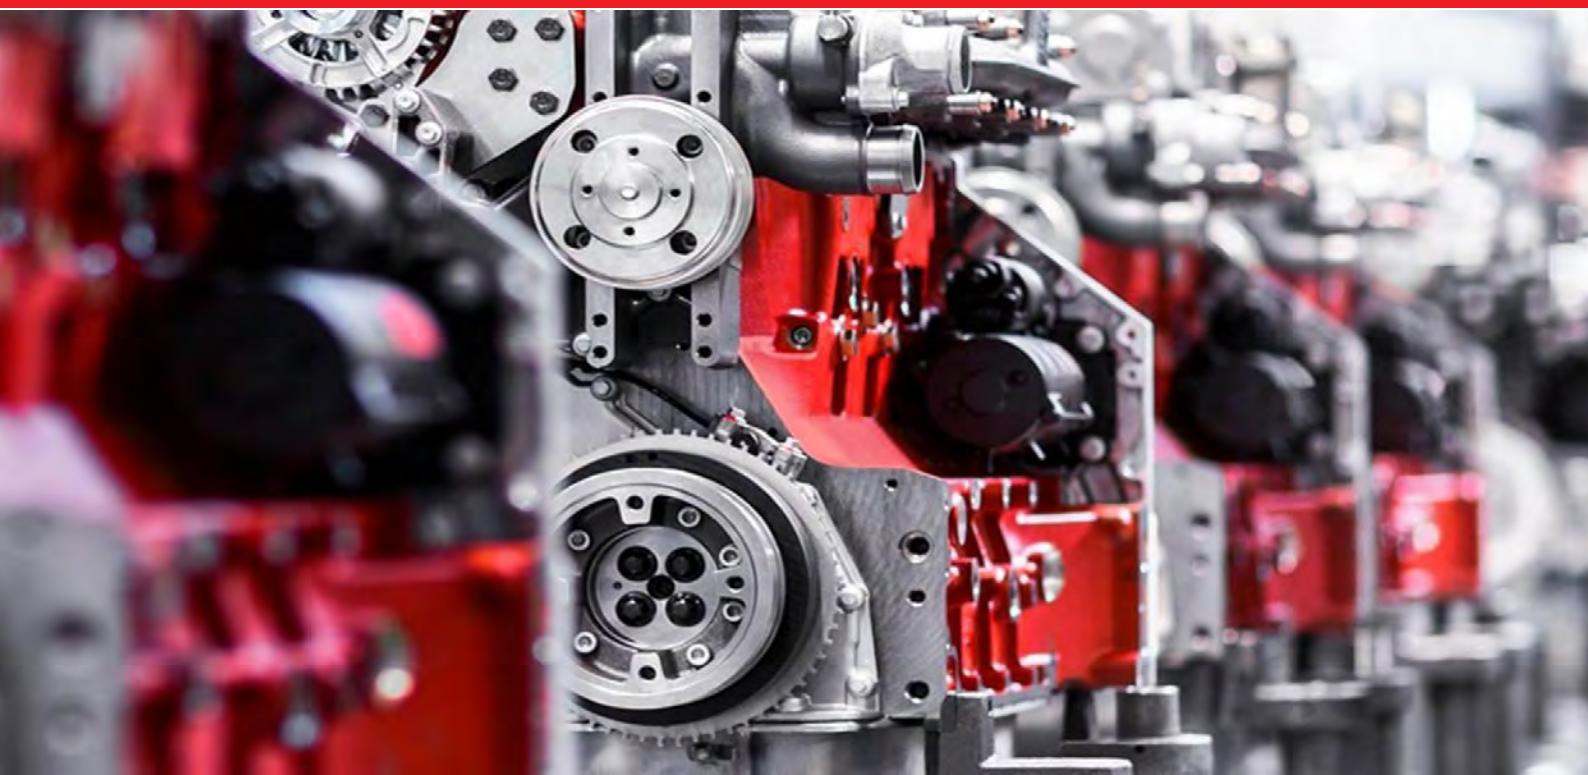

DIMENSIONS

■ Standard

The open DVERT® exhaust aftertreatment system (EAT) does not satisfy the regulations of certain markets that have specified additional limit values for the number of particles (e.g. Switzerland).

Note: The engine dimensions and weights vary depending on the scope of delivery.
